PANNITA PANANUN

Frontend Developer

Computer Engineering student with hands-on experience in building web applications using HTML, CSS, JavaScript, and basic React. Passionate about creating intuitive, user-friendly interfaces and improving overall user experience. Eager to develop both frontend development and UI/UX design skills through real-world projects, collaborative teamwork, and modern design practices. Motivated to grow as a designer who understands both the technical and visual sides of product development.

SKILL

- **Frontend** HTML, CSS, JavaScript, React (basic)
- **Mobile** Flutter, Dart
- **Backend** Firebase, SQL
- **Other** Python
- **Tools** Git, GitHub, Figma

EDUCATION

- **2023 - Present**
  Khon Kaen University Faculty of Engineering, Computer Engineering
  GPA 2.73

EXPERIENCE

- **2568**

  Special Award Winner – Psychology Insight True CyberSafe x TrueMoney Hackathon Thailand 2025 | Frontend Developer
  - In a 5-person team, participated in structured brainstorming sessions every two days. Took responsibility for designing wireframes and UI layouts with another team member to convey a "family" and "child-safety" theme. Developed the Frontend using **Flutter** and **Dart**, ensuring smooth integration with the team's features. Actively managed time in a high-pressure hackathon by planning daily progress checkpoints and aligning tasks with teammates to deliver features rapidly.
  - **Soft Skills** : Creative Problem-solving, Collaboration, UX Thinking, Time Management, Self-learning

  Volunteer Staff – World Robot Olympiad 2025, Northeast Regional Finals | Volunteer
  - Supervised a group of young participants alongside two other staff members, ensuring smooth coordination during competition rounds. Assisted with queue management, safety checks, and offering encouragement to help reduce stress among children.
  - **Soft Skills** : Communication, Responsibility, Team Coordination, Empathy

  Fortune-Telling Web Application | Frontend Developer
  - Served as the primary Frontend and UX/UI designer in a 3-person team. Designed page layouts, color palettes, and component structures while collaborating closely with another member to combine ideas into a cohesive interface. Implemented all major UI components in **HTML**/**CSS**/**JavaScript** and integrated **external APIs** to expand available features. Maintained constant communication with teammates to checking their progress, sharing updates on my own work, and adjusting designs based on team feedback. Participated actively in discussions on how to refine or extend the project in later stages.
  - **Soft Skills** : Teamwork, Communication, UI Collaboration, Iterative Improvement, Time Management
